The DOLCSAW1000H is a single door multifunction standalone access controller.

FEATURES

- Waterproof, conforms to IP66
- One relay, remote infrared programmer
- 1,000 users (998 common users + 2 panic users)
- Can be set to read EM card, HID card, or both
- Card block enrolment
- Tri-colour LED status display
- Integrated alarm & buzzer output
- Pulse mode, Toggle mode
- Can add and use 4~6 digits PIN on Infrared Remote Control
- 2 devices can be interlocked for 2 doors
- Built in light dependent resistor (LDR) for anti tamper
- Low temperature resistance(-40°F)

Installation and Wiring

- Remove the back cover from the unit
- Drill 2 holes(A,C) on the wall for the screws and one hole for the cable
- Knock the supplied rubber bungs to the screw holes(A,C)
- Fix the back cover firmly on the wall with 4 flat head screws
- Thread the cable through the cable hole(B)
- Attach the unit to the back cover

DC POWER SUPPLY

AC POWER SUPPLY

IMPORTANT

When use AC power supply, it must be connected with the Red wire(AC1) and the Pink wire (AC2) of the reader. It is forbidden to connect the AC power to Black wire (GND), or the reader will be damaged. Install a 1N4004 or equivalent diode is needed when use a common power supply, or the reader might be damaged. (1N4004 is included in the packing).

PROGRAMMING BY INFRARED REMOTE CONTROL

Programming will vary depending on access configuration. Follow the instructions according to your access configuration.

- **User ID number:** Assign a user ID to the access card in order to track it. The common user ID number can be any number from 0~997, the panic user ID is from 998~999. **IMPORTANT:** User IDs do not have to be preceded with any leading zeros. Recording of User ID is critical. Modifications to the user require the User ID be available.
- **Proximity Card:** Any 125KHz industry standard 26 bit EM and HID Proximity card or Tag.

Add a Card User	<div>1. (Read Master Add Card)</div> <div>2. (Read User Card)</div> <div>Repeat Step 2 for additional user cards</div> <div>3. (Read Master Add Card)</div>
Delete a Card User	<div>1. (Read Master Delete Card)</div> <div>2. (Read User Card)</div> <div>Repeat Step 2 for additional user cards</div> <div>3. (Read Master Delete Card)</div>

NOTE:

- If no Master Cards added, must press the Exit Button for at least 10 seconds before release
- Reset to Factory default, the user's information is still retained.

TO RESET TO FACTORY DEFAULT: Power off, press the Exit Button, hold it and power on, there will be two beeps, and the LED light turns into orange, release the exit button, then read any two 125KHz EM card or HID card, the LED will turn into red, means reset to Factory default successfully. Of the two cards reading, the 1st one is Master Add Card, the 2nd one is the Master Delete Card.
